SUMMARY

Highly motivated and detail-oriented recent graduate with a strong foundation in Python development, seeking an entry-level position to apply and expand my skills in building web applications and RESTful APIs. Proficient in Flask, Git, Web Scraping, Gui Development and database management.

EXPERIENCE

Blog

Developed a blog application using Flask, incorporating features like creating, editing, and deleting blog posts, user authentication, contact form, and an about page. Utilized Flask extensions such as Flask-Bootstrap, Flask-CKEditor, Flask-SQLAlchemy, and Flask-WTF for enhanced functionality and styling. Implemented responsive design and rich text editing capabilities for blog content.

Zillow Web Scraping and Data Entry Automation.

Developed a Python script utilizing BeautifulSoup and Selenium to scrape property data (price, address, and link) from a Zillow clone website. Automated data entry into a Google Form by programmatically filling and submitting the form with the extracted information, streamlining the process of collecting and organizing real estate data..

Pong Game

Developed a 2-player Pong game using Python and the turtle graphics library. Implemented game mechanics such as paddle movement, ball collision detection, scoring, and game over conditions. Organized the code using object-oriented programming principles for improved structure and maintainability, creating distinct classes for paddles, ball, score display, and the center line. Incorporated increasing ball speed for added difficulty and a reset functionality.

SKILLS

Full-stack Web development
API Development
Databases
Statistical Analysis
Version Control
GUI Development
Web Scraping

Programming Languages

HTML
CSS
Python
Javascript
Java

EDUCATION

Federal School of Dental Technology and Therapy, Enugu
— *Higher National Diploma*

September 2013 - September 2017

100 days of Python code(Udemy) — *Coding bootcamp by Angela Yu.*

2024 - 2025
